Museums must be reimagined if they are to stay relevant. Objects within showcases and interminable text panels do not make a museum anymore.

Our society needs institutions that offer enjoyable, social, empathetic, and accessible learning experiences.

We believe in the future of memorable installations, the importance of generating new sensations, creating emotions, being able to design experiences that make an impact, that are inclusive, accessible, different, and universal.

Exhibiting is no longer enough. Museum visitors are no longer satisfied with being passive, entering the museum, seeing exhibits and leaving. We must create a sense of community, generate a consolidated identity, and give much more importance to the local by producing unusual, novel, transforming experiences that make us rethink our environment and rediscover our senses, especially our sense of wonder and illusion.

Who we are

A company of specialists in museology and museography.
With over 25 years of experience, EVE Museos e Innovación has an important presence and position in the world of museums and cultural spaces.

EVE works along three strategic lines: EVE Museums and Innovation, EVE Exhibition Spaces and EVE Training, with an approach that allows us to share exciting experiences in the diffusion of knowledge, developing unique, accessible and different concepts.

Inspired by the digital transformation, we have created new ways of bringing the public closer to the contents of collections by generating memorable museological narratives and solutions that contribute to convey information in innovative ways and nurture curiosity about knowledge.

Our work methodology:
Innovation and Method.

EVE’s team of outstanding specialized professionals can respond to the demands of the most complex and advanced museological and museographic projects.

The philosophy that guides our work consists of conceptualizing and developing each project in a different way, working in close collaboration with promoters, museologists, communicators, museographers and production teams.
We conduct our work in multidisciplinary cells coordinated transversally in five directions: Cultural Strategy, Curatorship, Art and Design, User Experience, and Technology.

Depending on the type and scope of the project, these cells may include producers (of contents and/or of engineering), management strategists, user experience designers, illustrators, digital artists, photographers, audio and video specialists, engineers, marketing professionals, thematic experts, and museographers.
Experiences for a new age.
We participate in every stage of the essential functions of a museum: collecting, preserving, research, diffusion, and education.

Our work can start with the architectural proposal if required, the thematic conceptualization, strategic plans, museological plans, interactive exhibit production, makerspaces, museographic mounting, management setup, and even the museum’s operational training.
We create projects with innovative methodologies.
We manage collections and their contents. We design and produce both permanent and temporary multi-thematic exhibits anywhere in the world, and we also have a large catalog of exhibits for lease.

We innovate with ephemeral architectural products for commercial and institutional spaces, offering unique and customized solutions.

We also provide museology and museography advisory.
We train museum and culture professionals.
We train people in the different areas of museology and museography with online teaching systems and courses designed for students and professionals of museums and cultural management in all Spanish-speaking countries whose goal is to broaden their specialized training in museums.

We have created a face-to-face concept of museological and museographic research, the **Museological and Museographic Innovation Lab**, for students and museum or cultural professionals all over the world who seek to broaden their training by working on real projects.
